## Bright Spring Days.

The spring should be pre-eminently season of contentment, happiness and 25 hope. In these bright and pleasant months the country should enjoy its highest degrees of tranquility and prosperity. But spring, it is well known, is often a period of discomfort and disturbance in the physical system. Important organs of the body become torpid or irregular in their action, and the fact is instantly reflected in the meutal condition of the individual. A disordered liver means disordered nerves and a dull and unsteady brain. Anything which will bring the physical system into harmony with budding Nature confers an enormous benefit upon the nation, besides the mere allaying of physical discomfort. Hood's Sarsaparilla does this, as thousands of grateful and happy men and women can testify, and increased use of this standard spring medicine is of more real, practical importance in promoting health and quiet in the business world than reams of abstract theorizing.

### The Future of Farming.

(E. V. Smalley, in April Forum.)
The so-called bonanza wheat-farms of the North-west and the big farms of the California valleys grew out of transient conditions that no longer prevail—the California farms out of the Spanish land-grants and the Minnesota and Dakota farms out of the Congressional grants to railroads. The history of the North-western big farms is that the land was purchased from the railroad companies with depreciated stock and cost originally about one dollar per acre. The low price of wheat and the higher price of land have changed the makes but a moderate profit on the capital it represents in average crop years, and with a bad crop, it barely pays running expenses. It requires as careful management as a factory. I believe that we are now in a transition

#### Probable Murder.

The neighborhood of Hudson is considerably excited over some discoveries that point to a probable murder.

In an old field not far from this village a suit of gentleman's clothing was 50 found. The clothing was covered with blood and bore traces of violence. 10 About one hundred yards from where the clothing was found is a graveyard, and in the graveyard is a fresh grave, which cannot be accounted for. No one knows when the grave was made or whose body was placed in it, and the general opinion is that a murder has been committed and the victim buried the new-made grave will be dug into and its contents examined.
